5 Days Process

Source: The Sprint Book by Jake Knapp

What are the steps of a Design Sprint?

The 6 Sprint Stages

Understand:

Problem-finding

What are the user needs, business need and technology capacities?

Define:

What is the key strategy and focus?

Diverge:

How might we explore as many ideas as possible?

Decide:

Problem-solving

Select the best ideas so far.

Prototype:

Create an artifact that allows to test the ideas with users. Validate Test the ideas with users, business stakeholders and technical experts.

Validate

Test the ideas with users, business stakeholders and technical experts.
